Subject index

Methods and constructs

Theoretical

Computational methods for electronic structure

A theoretical study on the ionic states of difluoroethylene with an analysis of the vibrational structure of the photoelectron spectra, K. Takeshita 250 (1999) 113

In^+ cation interactions with some organics: ab initio molecular orbital and density functional theory, S. Arulmozhiraja, T. Fujii and H. Tokiwa 250 (1999) 237

-CI and valence bond approach

Local description of the through phenyl transfer of a negative charge within resonance theory: topological effects in xylylene radical anions, P. Karafiloglou and J.-P. Launay 250 (1999) 1

-density functional theory

Theoretical infrared spectrum and revised assignment for *para*-nitrophenol. Density functional theory studies, A.J. Abkowicz-Bieńko, Z. Latajka, D.C. Bieńko and D. Michalska 250 (1999) 123

In^+ cation interactions with some organics: ab initio molecular orbital and density functional theory, S. Arulmozhiraja, T. Fujii and H. Tokiwa 250 (1999) 237

Semiempirical methods

A tight-binding model of phenylene molecules with *meta*-connections – implications for phenylacetylene dendrimers, Y. Shimoi and B.A. Friedman 250 (1999) 13

Theoretical investigation on the impact sensitivity of tetrazole derivatives and their metal salts, C. ZhaoXu, X. Heming and Y. Shulin 250 (1999) 243

Spin states and magnetic interactions

Spin density in a triazole-nitronyl-nitroxide radical presenting linear ferromagnetic interactions: role of hydrogen bonding, B. Gillon, M.A. Aebersold, O. Kahn, L. Pardi and B. Delley 250 (1999) 23

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)

Picosecond laser control of bond-selective dissociation and clockwise and anticlockwise rotation of the dissociation fragments: applications to a three-dimensional model of $HONO_2$ in the ground electronic state, M. Oppel and G.K. Paramonov 250 (1999) 131

PII: S0301-0104(99)00373-0

Anharmonic effects on theoretical IR line shapes of H-bonds, O. Henri-Rousseau and P. Blaise 250 (1999) 249

Photon states and statistics

Energy transfer and migration in highly forbidden transitions of lanthanide ion doped crystals, M. Chua and P.A. Tanner 250 (1999) 267

Scattering of waves and particles

Molecular resistivities in organic polyenic wires. I. A one-dimensional photoconduction charge transfer model, C. González and R.G.E. Morales 250 (1999) 279

Intramolecular dynamics

Vibrational dynamics in liquids and frozen matrices. Concentration and solvent effects in phenylacetylene by low temperature Raman spectroscopy, B. Brożek and H. Abramczyk 250 (1999) 35

Picosecond laser control of bond-selective dissociation and clockwise and anticlockwise rotation of the dissociation fragments: applications to a three-dimensional model of $HONO_2$ in the ground electronic state, M. Oppel and G.K. Paramonov 250 (1999) 131

Is there a correlation between phase transitions of phenylacetylene in liquids and frozen matrices and vibrational dynamics?, H. Abramczyk and B. Brożek 250 (1999) 145

Anharmonic effects on theoretical IR line shapes of H-bonds, O. Henri-Rousseau and P. Blaise 250 (1999) 249

Molecular dynamics of many particle systems and condensed phases

A new intermolecular polarizable potential for *cis*-formic acid. Introduction of many-body interactions in condensed phases, J.M. Hermida Ramón and M.A. Ríos 250 (1999) 155

Dynamic stability ratio of a colloidal dispersion, Y.-C. Kuo and J.-P. Hsu 250 (1999) 285

The effect of a cluster on a chemical reaction: a quasiclassical trajectory study, S. Adhikari and G.D. Billing 250 (1999) 295

Molecular dynamics study of phase transition and nucleation in supercooled clusters of potassium iodide, X.-l. Zhu, X.-z. You, D.-r. Zhu and Z.-h. Zhou 250 (1999) 303

Migration and interaction on grids and lattices

Carrier range on finite, isolated molecular wires in a monomer crystalline matrix. Example: polydiacetylene, 4BCMU, S. Spagnoli, K.J. Donovan, K. Scott, M. Somerton and E.G. Wilson 250 (1999) 71

Statistical computational methods (incl. Monte Carlo)

A new intermolecular polarizable potential for *cis*-formic acid. Introduction of many-body interactions in condensed phases, J.M. Hermida Ramón and M.A. Ríos 250 (1999) 155

Dynamics of structures, lattices and macromolecular conformations

Theoretical investigation on the impact sensitivity of tetrazole derivatives and their metal salts, C. ZhaoXu, X. Heming and Y. Shulin 250 (1999) 243

Equilibrium statistical mechanics and thermodynamics

Effects of surfactants on the aggregation behaviour of thiacarbocyanine dyes, A.K. Chibisov, V.I. Prokhorenko and H. Görner 250 (1999) 47

Time and space correlation functions
A new intermolecular polarizable potential for *cis*-formic acid. Introduction of many-body interactions in condensed phases, J.M. Hermida Ramón and M.A. Ríos 250 (1999) 155
Photodynamic properties of green fluorescent proteins investigated by fluorescence correlation spectroscopy, J. Widengren, Ü. Mets and R. Rigler 250 (1999) 171

Experiment

Molecular spectroscopy
Effect of intramolecular hydrogen bonding on the empty level structure of gas-phase salicylaldehyde:electron affinities and anion yield upon electron impact, A. Modelli, F. Scagnolari and G. Distefano 250 (1999) 311
Estimation of electron transfer rate constants by static (optical and electrochemical) measurements, M. López-López, P. Pérez-Tejeda, P. López-Cornejo and F. Sánchez 250 (1999) 321

-infrared
Theoretical infrared spectrum and revised assignment for *para*-nitrophenol. Density functional theory studies, A.J. Abkowicz-Bieńko, Z. Latajka, D.C. Bieńko and D. Michalska 250 (1999) 123
The vibrational spectrum of PdCO isolated in solid argon, B. Tremblay and L. Manceron 250 (1999) 187

-Raman
Vibrational dynamics in liquids and frozen matrices. Concentration and solvent effects in phenylacetylene by low temperature Raman spectroscopy, B. Brożek and H. Abramczyk 250 (1999) 35
Is there a correlation between phase transitions of phenylacetylene in liquids and frozen matrices and vibrational dynamics?, H. Abramczyk and B. Brożek 250 (1999) 145

-visible
Effects of surfactants on the aggregation behaviour of thiacarbocyanine dyes, A.K. Chibisov, V.I. Prokhorenko and H. Görner 250 (1999) 47
DC photoconduction action spectra in thin film polymer crystals of 3 and 4BCMU polydiacetylene, K.J. Donovan, K. Scott, S. Spagnoli and J. Berrehar 250 (1999) 61
Multistep photoinduced proton transfer in crystalline 2-(2′,4′-dinitrobenzyl)pyridine, O. Ziane, R. Casalegno and A. Corval 250 (1999) 199

Photoelectron and Auger spectroscopy
A theoretical study on the ionic states of difluoroethylene with an analysis of the vibrational structure of the photoelectron spectra, K. Takeshita 250 (1999) 113
Fragmentation of the valence electronic states of NF_3^+ studied by threshold photoelectron–photoion coincidence spectroscopy, D.P. Seccombe, G.K. Jarvis, B.O. Fisher and R.P. Tuckett 250 (1999) 335

Electron impact spectroscopy
Effect of intramolecular hydrogen bonding on the empty level structure of gas-phase salicylaldehyde:electron affinities and anion yield upon electron impact, A. Modelli, F. Scagnolari and G. Distefano 250 (1999) 311

Laser induced fluorescence
Photodynamic properties of green fluorescent proteins investigated by fluorescence correlation spectroscopy, J. Widengren, Ü. Mets and R. Rigler 250 (1999) 171

Nonlinear optics and spectroscopy
Compression of the dye monolayer at the air/water interface studied by second harmonic generation, V. Tsukanova, O. Slyadneva, T. Inoue, A. Harata and T. Ogawa 250 (1999) 207

Synchrotron spectroscopies
Fragmentation of three isotopic toluene monocations in the 15–100 eV photon energy range, T.A. Field, F. Dulieu, J.-H. Fillion, J.-L. Chotin, S. Douin, J.-L. Lemaire and S. Leach 250 (1999) 81
A photoabsorption and mass spectrometry study of pyrrole, E.E. Rennie, C.A.F. Johnson, J.E. Parker, R. Ferguson, D.M.P. Holland and D.A. Shaw 250 (1999) 217
Fragmentation of the valence electronic states of NF_3^+ studied by threshold photoelectron–photoion coincidence spectroscopy, D.P. Seccombe, G.K. Jarvis, B.O. Fisher and R.P. Tuckett 250 (1999) 335

Mass spectroscopy
Fragmentation of three isotopic toluene monocations in the 15–100 eV photon energy range, T.A. Field, F. Dulieu, J.-H. Fillion, J.-L. Chotin, S. Douin, J.-L. Lemaire and S. Leach 250 (1999) 81
A photoabsorption and mass spectrometry study of pyrrole, E.E. Rennie, C.A.F. Johnson, J.E. Parker, R. Ferguson, D.M.P. Holland and D.A. Shaw 250 (1999) 217
In^+ cation interactions with some organics: ab initio molecular orbital and density functional theory, S. Arulmozhiraja, T. Fujii and H. Tokiwa 250 (1999) 237
Fragmentation of the valence electronic states of NF_3^+ studied by threshold photoelectron–photoion coincidence spectroscopy, D.P. Seccombe, G.K. Jarvis, B.O. Fisher and R.P. Tuckett 250 (1999) 335

X-ray, electron and neutron diffraction
Spin density in a triazole-nitronyl-nitroxide radical presenting linear ferromagnetic interactions: role of hydrogen bonding, B. Gillon, M.A. Aebersold, O. Kahn, L. Pardi and B. Delley 250 (1999) 23

Calorimetric methods
Vibrational dynamics in liquids and frozen matrices. Concentration and solvent effects in phenylacetylene by low temperature Raman spectroscopy, B. Brożek and H. Abramczyk 250 (1999) 35
Is there a correlation between phase transitions of phenylacetylene in liquids and frozen matrices and vibrational dynamics?, H. Abramczyk and B. Brożek 250 (1999) 145

Measurement of macroscopic variables
Estimation of electron transfer rate constants by static (optical and electrochemical) measurements, M. López-López, P. Pérez-Tejeda, P. López-Cornejo and F. Sánchez 250 (1999) 321

Objects

Bulk systems

Gases
Theoretical investigation on the impact sensitivity of tetrazole derivatives and their metal salts, C. ZhaoXu, X. Heming and Y. Shulin 250 (1999) 243

Effect of intramolecular hydrogen bonding on the empty level structure of gas-phase salicylaldehyde:electron affinities and anion yield upon electron impact, A. Modelli, F. Scagnolari and G. Distefano 250 (1999) 311

Liquids neat

Vibrational dynamics in liquids and frozen matrices. Concentration and solvent effects in phenylacetylene by low temperature Raman spectroscopy, B. Brożek and H. Abramczyk 250 (1999) 35

Is there a correlation between phase transitions of phenylacetylene in liquids and frozen matrices and vibrational dynamics?, H. Abramczyk and B. Brożek 250 (1999) 145

A new intermolecular polarizable potential for *cis*-formic acid. Introduction of many-body interactions in condensed phases, J.M. Hermida Ramón and M.A. Ríos 250 (1999) 155

Liquid mixtures and solutions

Dynamic stability ratio of a colloidal dispersion, Y.-C. Kuo and J.-P. Hsu 250 (1999) 285

Estimation of electron transfer rate constants by static (optical and electrochemical) measurements, M. López-López, P. Pérez-Tejeda, P. López-Cornejo and F. Sánchez 250 (1999) 321

Crystals

Energy transfer and migration in highly forbidden transitions of lanthanide ion doped crystals, M. Chua and P.A. Tanner 250 (1999) 267

Multistep photoinduced proton transfer in crystalline 2-(2′,4′-dinitrobenzyl)pyridine, O. Ziane, R. Casalegno and A. Corval 250 (1999) 199

Complex fluids

-micelles

Effects of surfactants on the aggregation behaviour of thiacarbocyanine dyes, A.K. Chibisov, V.I. Prokhorenko and H. Görner 250 (1999) 47

Polymers

DC photoconduction action spectra in thin film polymer crystals of 3 and 4BCMU polydiacetylene, K.J. Donovan, K. Scott, S. Spagnoli and J. Berrehar 250 (1999) 61

Carrier range on finite, isolated molecular wires in a monomer crystalline matrix. Example: polydiacetylene, 4BCMU, S. Spagnoli, K.J. Donovan, K. Scott, M. Somerton and E.G. Wilson 250 (1999) 71

Surfaces

Compression of the dye monolayer at the air/water interface studied by second harmonic generation, V. Tsukanova, O. Slyadneva, T. Inoue, A. Harata and T. Ogawa 250 (1999) 207

Dynamic stability ratio of a colloidal dispersion, Y.-C. Kuo and J.-P. Hsu 250 (1999) 285

Low-dimensional materials

DC photoconduction action spectra in thin film polymer crystals of 3 and 4BCMU polydiacetylene, K.J. Donovan, K. Scott, S. Spagnoli and J. Berrehar 250 (1999) 61

Carrier range on finite, isolated molecular wires in a monomer crystalline matrix. Example: polydiacetylene, 4BCMU, S. Spagnoli, K.J. Donovan, K. Scott, M. Somerton and E.G. Wilson 250 (1999) 71

Microscopic and mesoscopic systems

Molecules (neutral and ionic)

Spin density in a triazole-nitronyl-nitroxide radical presenting linear ferromagnetic interactions: role of hydrogen bonding, B. Gillon, M.A. Aebersold, O. Kahn, L. Pardi and B. Delley 250 (1999) 23

Vibrational dynamics in liquids and frozen matrices. Concentration and solvent effects in phenylacetylene by low temperature Raman spectroscopy, B. Brożek and H. Abramczyk 250 (1999) 35

A theoretical study on the ionic states of difluoroethylene with an analysis of the vibrational structure of the photoelectron spectra, K. Takeshita 250 (1999) 113

Theoretical infrared spectrum and revised assignment for *para*-nitrophenol. Density functional theory studies, A.J. Abkowicz-Bieńko, Z. Latajka, D.C. Bieńko and D. Michalska 250 (1999) 123

-small polyatomics

Picosecond laser control of bond-selective dissociation and clockwise and anticlockwise rotation of the dissociation fragments: applications to a three-dimensional model of $HONO_2$ in the ground electronic state, M. Oppel and G.K. Paramonov 250 (1999) 131

The vibrational spectrum of PdCO isolated in solid argon, B. Tremblay and L. Manceron 250 (1999) 187

Effect of intramolecular hydrogen bonding on the empty level structure of gas-phase salicylaldehyde:electron affinities and anion yield upon electron impact, A. Modelli, F. Scagnolari and G. Distefano 250 (1999) 311

Fragmentation of the valence electronic states of NF_3^+ studied by threshold photoelectron–photoion coincidence spectroscopy, D.P. Seccombe, G.K. Jarvis, B.O. Fisher and R.P. Tuckett 250 (1999) 335

-aromatics

Local description of the through phenyl transfer of a negative charge within resonance theory: topological effects in xylylene radical anions, P. Karafiloglou and J.-P. Launay 250 (1999) 1

A tight-binding model of phenylene molecules with *meta*-connections – implications for phenylacetylene dendrimers, Y. Shimoi and B.A. Friedman 250 (1999) 13

Fragmentation of three isotopic toluene monocations in the 15–100 eV photon energy range, T.A. Field, F. Dulieu, J.-H. Fillion, J.-L. Chotin, S. Douin, J.-L. Lemaire and S. Leach 250 (1999) 81

A photoabsorption and mass spectrometry study of pyrrole, E.E. Rennie, C.A.F. Johnson, J.E. Parker, R. Ferguson, D.M.P. Holland and D.A. Shaw 250 (1999) 217

Molecular aggregates

-dimers

Effects of surfactants on the aggregation behaviour of thiacarbocyanine dyes, A.K. Chibisov, V.I. Prokhorenko and H. Görner 250 (1999) 47

Anharmonic effects on theoretical IR line shapes of H-bonds, O. Henri-Rousseau and P. Blaise 250 (1999) 249

-clusters

A new intermolecular polarizable potential for *cis*-formic acid. Introduction of many-body interactions in condensed phases, J.M. Hermida Ramón and M.A. Ríos 250 (1999) 155

The effect of a cluster on a chemical reaction: a quasiclassical trajectory study, S. Adhikari and G.D. Billing 250 (1999) 295

Molecular dynamics study of phase transition and nucleation in supercooled clusters of potassium iodide, X.-l. Zhu, X.-z. You, D.-r. Zhu and Z.-h. Zhou 250 (1999) 303

-complexes

In^+ cation interactions with some organics: ab initio molecular orbital and density functional theory, S. Arulmozhiraja, T. Fujii and H. Tokiwa 250 (1999) 237

Estimation of electron transfer rate constants by static (optical and electrochemical) measurements, M. López-López, P. Pérez-Tejeda, P. López-Cornejo and F. Sánchez 250 (1999) 321

Free radicals (incl. hydronium and muonium)

Local description of the through phenyl transfer of a negative charge within resonance theory: topological effects in xylylene radical anions, P. Karafiloglou and J.-P. Launay 250 (1999) 1

Ions and charge carriers

Carrier range on finite, isolated molecular wires in a monomer crystalline matrix. Example: polydiacetylene, 4BCMU, S. Spagnoli, K.J. Donovan, K. Scott, M. Somerton and E.G. Wilson 250 (1999) 71

Proteins

Photodynamic properties of green fluorescent proteins investigated by fluorescence correlation spectroscopy, J. Widengren, Ü. Mets and R. Rigler 250 (1999) 171

Phenomena

Vibrations and rotations of molecules

Vibrational dynamics in liquids and frozen matrices. Concentration and solvent effects in phenylacetylene by low temperature Raman spectroscopy, B. Brożek and H. Abramczyk 250 (1999) 35

Theoretical infrared spectrum and revised assignment for *para*-nitrophenol. Density functional theory studies, A.J. Abkowicz-Bieńko, Z. Latajka, D.C. Bieńko and D. Michalska 250 (1999) 123

Is there a correlation between phase transitions of phenylacetylene in liquids and frozen matrices and vibrational dynamics?, H. Abramczyk and B. Brożek 250 (1999) 145

The vibrational spectrum of PdCO isolated in solid argon, B. Tremblay and L. Manceron 250 (1999) 187

Electronic structure and states

Local description of the through phenyl transfer of a negative charge within resonance theory: topological effects in xylylene radical anions, P. Karafiloglou and J.-P. Launay 250 (1999) 1

A tight-binding model of phenylene molecules with *meta*-connections – implications for phenylacetylene dendrimers, Y. Shimoi and B.A. Friedman 250 (1999) 13

DC photoconduction action spectra in thin film polymer crystals of 3 and 4BCMU polydiacetylene, K.J. Donovan, K. Scott, S. Spagnoli and J. Berrehar 250 (1999) 61

Molecular resistivities in organic polyenic wires. I. A one-dimensional photoconduction charge transfer model, C. González and R.G.E. Morales 250 (1999) 279

Effect of intramolecular hydrogen bonding on the empty level structure of gas-phase salicylaldehyde:electron affinities and anion yield upon electron impact, A. Modelli, F. Scagnolari and G. Distefano 250 (1999) 311

Electric and magnetic properties
Spin density in a triazole-nitronyl-nitroxide radical presenting linear ferromagnetic interactions: role of hydrogen bonding, B. Gillon, M.A. Aebersold, O. Kahn, L. Pardi and B. Delley 250 (1999) 23
Molecular resistivities in organic polyenic wires. I. A one-dimensional photoconduction charge transfer model, C. González and R.G.E. Morales 250 (1999) 279

Molecular interactions
Compression of the dye monolayer at the air/water interface studied by second harmonic generation, V. Tsukanova, O. Slyadneva, T. Inoue, A. Harata and T. Ogawa 250 (1999) 207
In^+ cation interactions with some organics: ab initio molecular orbital and density functional theory, S. Arulmozhiraja, T. Fujii and H. Tokiwa 250 (1999) 237

Spectral bandshapes and intensities
A theoretical study on the ionic states of difluoroethylene with an analysis of the vibrational structure of the photoelectron spectra, K. Takeshita 250 (1999) 113
Anharmonic effects on theoretical IR line shapes of H-bonds, O. Henri-Rousseau and P. Blaise 250 (1999) 249

Energy transfer processes
Energy transfer and migration in highly forbidden transitions of lanthanide ion doped crystals, M. Chua and P.A. Tanner 250 (1999) 267

Molecular photophysical processes
Photodynamic properties of green fluorescent proteins investigated by fluorescence correlation spectroscopy, J. Widengren, Ü. Mets and R. Rigler 250 (1999) 171

Photochemistry
Effects of surfactants on the aggregation behaviour of thiacarbocyanine dyes, A.K. Chibisov, V.I. Prokhorenko and H. Görner 250 (1999) 47
Picosecond laser control of bond-selective dissociation and clockwise and anticlockwise rotation of the dissociation fragments: applications to a three-dimensional model of $HONO_2$ in the ground electronic state, M. Oppel and G.K. Paramonov 250 (1999) 131
Compression of the dye monolayer at the air/water interface studied by second harmonic generation, V. Tsukanova, O. Slyadneva, T. Inoue, A. Harata and T. Ogawa 250 (1999) 207
A photoabsorption and mass spectrometry study of pyrrole, E.E. Rennie, C.A.F. Johnson, J.E. Parker, R. Ferguson, D.M.P. Holland and D.A. Shaw 250 (1999) 217
Multistep photoinduced proton transfer in crystalline 2-(2′,4′-dinitrobenzyl)pyridine, O. Ziane, R. Casalegno and A. Corval 250 (1999) 199

Intramolecular dynamics
Anharmonic effects on theoretical IR line shapes of H-bonds, O. Henri-Rousseau and P. Blaise 250 (1999) 249

-vibrational energy redistribution (incl. vibrational dissociation)
Picosecond laser control of bond-selective dissociation and clockwise and anticlockwise rotation of the dissociation fragments: applications to a three-dimensional model of $HONO_2$ in the ground electronic state, M. Oppel and G.K. Paramonov 250 (1999) 131

Fragmentation of the valence electronic states of NF_3^+ studied by threshold photoelectron–photoion coincidence spectroscopy, D.P. Seccombe, G.K. Jarvis, B.O. Fisher and R.P. Tuckett 250 (1999) 335

Nonlinear responses (incl. optical)
Molecular resistivities in organic polyenic wires. I. A one-dimensional photoconduction charge transfer model, C. González and R.G.E. Morales 250 (1999) 279
Estimation of electron transfer rate constants by static (optical and electrochemical) measurements, M. López-López, P. Pérez-Tejeda, P. López-Cornejo and F. Sánchez 250 (1999) 321

Reactions (incl. dissociation)
Theoretical investigation on the impact sensitivity of tetrazole derivatives and their metal salts, C. ZhaoXu, X. Heming and Y. Shulin 250 (1999) 243
Dynamic stability ratio of a colloidal dispersion, Y.-C. Kuo and J.-P. Hsu 250 (1999) 285
The effect of a cluster on a chemical reaction: a quasiclassical trajectory study, S. Adhikari and G.D. Billing 250 (1999) 295

-isolated molecules
A photoabsorption and mass spectrometry study of pyrrole, E.E. Rennie, C.A.F. Johnson, J.E. Parker, R. Ferguson, D.M.P. Holland and D.A. Shaw 250 (1999) 217

-condensed phase
Molecular dynamics study of phase transition and nucleation in supercooled clusters of potassium iodide, X.-l. Zhu, X.-z. You, D.-r. Zhu and Z.-h. Zhou 250 (1999) 303

Tunneling
Carrier range on finite, isolated molecular wires in a monomer crystalline matrix. Example: polydiacetylene, 4BCMU, S. Spagnoli, K.J. Donovan, K. Scott, M. Somerton and E.G. Wilson 250 (1999) 71

Electron transfer
Local description of the through phenyl transfer of a negative charge within resonance theory: topological effects in xylylene radical anions, P. Karafiloglou and J.-P. Launay 250 (1999) 1
Molecular resistivities in organic polyenic wires. I. A one-dimensional photoconduction charge transfer model, C. González and R.G.E. Morales 250 (1999) 279
Estimation of electron transfer rate constants by static (optical and electrochemical) measurements, M. López-López, P. Pérez-Tejeda, P. López-Cornejo and F. Sánchez 250 (1999) 321

Proton and hydrogen atom transfer
Multistep photoinduced proton transfer in crystalline 2-(2′,4′-dinitrobenzyl)pyridine, O. Ziane, R. Casalegno and A. Corval 250 (1999) 199

Ionization (incl. Rydberg states)
Fragmentation of three isotopic toluene monocations in the 15–100 eV photon energy range, T.A. Field, F. Dulieu, J.-H. Fillion, J.-L. Chotin, S. Douin, J.-L. Lemaire and S. Leach 250 (1999) 81
A theoretical study on the ionic states of difluoroethylene with an analysis of the vibrational structure of the photoelectron spectra, K. Takeshita 250 (1999) 113

Fragmentation of the valence electronic states of NF_3^+ studied by threshold photoelectron–photoion coincidence spectroscopy, D.P. Seccombe, G.K. Jarvis, B.O. Fisher and R.P. Tuckett 250 (1999) 335

Molecular motion (incl. diffusive)

Photodynamic properties of green fluorescent proteins investigated by fluorescence correlation spectroscopy, J. Widengren, Ü. Mets and R. Rigler 250 (1999) 171

Isotopic effects

Fragmentation of three isotopic toluene monocations in the 15–100 eV photon energy range, T.A. Field, F. Dulieu, J.-H. Fillion, J.-L. Chotin, S. Douin, J.-L. Lemaire and S. Leach 250 (1999) 81

Surface chemical physics

-adsorption

Compression of the dye monolayer at the air/water interface studied by second harmonic generation, V. Tsukanova, O. Slyadneva, T. Inoue, A. Harata and T. Ogawa 250 (1999) 207

Molecular self-assembly and -organization

Effects of surfactants on the aggregation behaviour of thiacarbocyanine dyes, A.K. Chibisov, V.I. Prokhorenko and H. Görner 250 (1999) 47
